Athens Cast
Aluminum Base
with Wheels

Product Description: The Athens is a 108 lb. two-tone cast aluminum base with wheels, designed for hospitality and high-end residential applications. Fusing design with functionality, we have crafted a market base that has the best of both. The simplistic curves, along with the two-tone colors gives a contemporary and high-end complement to any market umbrella.

Operational/Functional Aspects: With a cast aluminum construction, the Athens umbrella base, features a self-adjusting clamp to provide commercial support and a bolted base stem to deliver enhanced commercial strength. Two wheels are incorporated into the design for ease of mobility. Compatible with a 30 lb. add-on weight for additional stability.

Colors of Finishes Available: Artic White, Shadow Graphite

TUUCI

Equinox Cabana
with Automated
Louvered Roof

Product Description: Building on TUUCI's custom-configurable cabanas and pergola systems, the TUUCI Equinox Cabana with Automated Louvered Roof further establishes TUUCI's leadership in architectural shade design with functional and elegant shelter. This patent-pending product features durable, aluminum louvers that automatically adjust for wind and rain to provide optimum shelter while creating a luxurious, open-air room with an abundance of comfort and outdoor accessibility. The louvers are also operable via remote control.

Operational/Functional Aspects: The TUUCI Equinox Cabana with Automated Louvered Roof showcases a control unit with an advanced high-wind sensor and rain sensor which detects ambient conditions and can deploy the louvered roof into an open or closed position as needed.

Features and benefits for the Automated Louvered Roof include:

- Durable and modular individual louver design that is easily installed and serviced.
- Touch pad controls adjust the louvers a full 135-degree range, filtering sunlight, encouraging air circulation or channeling rainwater as various conditions are presented.
- Discrete channels guide rainwater to the ground, maintaining dry and comfortable interior shelter
- Marine-grade, corrosion-resistant aluminum and stainless-steel components ensure durable and reliable function while providing a nautical aesthetic
- TUUCI's exclusive Aluma-TEAK™ wood finishes and weather-resistant powder coat applications may be applied across a range of cabana shapes and sizes.
- Additional options include heating, lighting, USB charging ports and lounge seating configurations.

Colors of Finishes Available: Available in a range of Plantation Aluma-TEAK and Powder Coat finishes.

WOODLINE SHADE SOLUTIONS

Easilift Umbrella

Easilift Umbrella

Designer: Tim Yates
& Fritz Walter

Product Dimensions:

Canopy: 9'x 8.2'

Ground clearance closed: 3.1'

Weight: 30.86 lbs.

Product Description: The Easilift system is constructed out of 1, 9-inch natural anodized aluminum pole and aluminum ribs and stretchers; a combination of aluminum and stainless steel for the upper and lower hubs with an easy grip runner made from strong and durable ABS, stainless-steel pins and brackets and fittings secure the ribs and stretchers in place; the rib ends are protected with nylon caps and the canopy is fastened with our marine grade LOXX attachment system.

Operational/Functional Aspects: Featuring a concealed automatic raising system designed for effortless operation, with the canopy automatically locking in position once fully opened. No locking pin, ropes, pulleys or cranks are used, resulting in a sleek, modern design with maximum efficiency. To open, simply lift the arm until the Easilift system takes over, automatically raising the umbrella until it is totally open. To close, simply pull down on the sliding hub until the Easilift system takes over, closing the umbrella automatically.

Colors of Finishes Available: Natural Anodized Aluminum/Various Canopy Colors
